

GLIEC Sustainability & Environmental Performance Summary Updated: April 21, 2026

Great Lakes Industrial Environmental Construction (GLIEC) is committed to delivering environmentally responsible, safety-driven services across industrial and utility environments. Our approach focuses on compliance, operational efficiency, and continuous improvement.

Environmental Responsibility

- 1 Proper waste handling, transport, and disposal
- 2 Recycling and material recovery where feasible
- 3 Spill containment and remediation services
- 4 Prevention of cross-contamination during operations

Safety & Compliance

- 1 Adherence to OSHA, EPA, and DOT regulations
- 2 Confined space and hazardous environment protocols
- 3 Ongoing workforce training (HAZWOPER, safety programs)
- 4 Site-specific hazard assessments and planning

Operational Efficiency

- 1 Efficient deployment of equipment and personnel
- 2 Minimizing downtime for client operations
- 3 Strategic planning to reduce environmental impact
- 4 Use of specialized equipment for restricted access areas

Performance Tracking

- 1 Waste volumes handled and disposed
- 2 Recycling and material diversion efforts
- 3 Safety performance and training activity
- 4 Project execution efficiency and response times

Continuous Improvement

- 1 Expanding internal tracking and reporting
- 2 Enhancing transparency and accountability
- 3 Strengthening safety culture
- 4 Supporting long-term environmental stewardship

GLIEC remains committed to supporting clients with reliable, compliant, and environmentally responsible solutions. For more information, please contact our team.
